COVERAGE

HOW IT WORKS

This theft deterrent system is permanently installed on the covered Vehicle to prevent it from being stolen. Permanent id tags are placed on multiple areas of the vehicle, and the ids are databased in order to be used when and if a part needs to be identified during a recovery. This unique process is non-cancelable and non-refundable.

WARRANTY DETAILS

In the event that the Theft Deterrent System installed on the Vehicle fails to prevent it from being stolen and such failure results in Total Loss, which means that the covered Vehicle is stolen and not recovered within thirty (30) days, or recovered and damaged to the extent that the primary insurance company declares the vehicle a total loss, this warranty will pay up to \$3,000 for insured recreational vehicles and up to \$5,000 on covered automobile replacement allowance to be used toward the purchase of a replacement vehicle.

In the event that such failure results in the Vehicle being stolen but recovered within 30 days of the date of loss, up to \$500 deductible reimbursement will be made payable directly to the customer but limited to the customer's actual primary insurance deductible amount or the amount of damage, whichever is the lesser.

*Warranties vary, ask your selling dealership for specific warranty details.
